This ought to be in the script tag.

```
<!--  
function nav()  
{  
var w = document.myform.mylist.selectedIndex;  
var URL_add = document.myform.mylist.options[w].value;  
window.location.href = URL_add;  
}  
//-->
```

And here is the form tag.

```
<form action="action.cfm" name="myform" id="myform">  
Jump to:  
<select name="mylist" onChange="nav()">  
<option value="thisURL.cfm?ID=36" selected>This  
<option value="thisURL.cfm?ID=66">That  
<option value="thisURL.cfm?ID=65">Here  
<option value="thisURL.cfm?ID=59">There  
<option value="thisURL.cfm?ID=45">Nowhere  
<option value="thisURL.cfm?ID=58">Other  
<option value="thisURL.cfm?ID=55">Random  
</select>  
</form>
```
