Developers may sometimes want to have a horizontal scroll bar nested at the bottom of select option fields.

There is a way to encapsulate the select and option elements with a DIV tag.

```
<cfquery name="getDepartment" datasource="cfdocexamples">

SELECT Dept_ID,Dept_Name

FROM Departments

</cfquery>

<form>

<div style="overflow-x:scroll; width:200px; overflow: -moz-scrollbars-horizontal;">

<select name="thisSelectList" size="5">

<cfoutput query="getDepartment">

   <option value="#Dept_ID#" title="#Dept_Name#">#Dept_Name#

                         </option>

</cfoutput>

</select>

</div>

</form>
```
